Full-Service Pump Repair and Machine Shop Service

Professional Pump offers both "in house" and "on site" repair for all major pump brands. We offer our complete machine shop capabilities as well as complete service crew "24 hours" a day, 7 days a week. Professional Pump has now partnered with Goulds "Pro Services Group" to offer additional service including gear box repair, line boring and many additional tier three services. In addition, we also repair and replace all brands of mechanical seals.

System Design, Engineering and Fabrication

We specialize in helping you identify your liquid and air handling system requirements. Our engineering and design team will provide system solutions to meet your specific needs. Professional Pump's fabrication department will design, build and install your custom liquid or air handling system, bringing the conceptual to reality.
